## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to a semiconductor device, classified in class 257, subclass 687.
  - II. Claim 17, drawn to a semiconductor method, classified in class 438, subclass 124.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process that does not include the steps of attaching a semiconductor chip to a substrate or chip pad of a lead frame; wire bonding respective ends of a plurality of wires firstly to the pads on the chip, and secondly to leads on said substrate or lead frame; disposing a polymeric material with foaming agent onto said wire bonds; allowing the foaming reaction to proceed to near completion; curing said polymeric material; and molding a housing or package.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

The inventions are distinct, each from the other because of the following reasons:
